

Ministry of Children, Community and Social Services (MCCSS) funds community agencies who provide supportive housing options to people with developmental disabilities. Learning more about these residential services and supports can help you find a home that works for your needs.

## Housing options

A DSO housing navigator in your area can help you understand your housing options by:

- providing you with resources and organizations that can help you create a housing plan.
- providing you with a toolkit of resources to help with a housing plan.
- connecting you with family support networks to share information.
- supporting innovative approaches and planning for housing, beyond the traditional models available.
